# The Shoals Short-Term Lease Opportunity — Charts & Tables

Companion to the Competitive Analyst Report · Bobo Family Group · Sep 30, 2026 · all figures from sources cited on last page

## 1 · The price ladder: we fill the gap between scraps and hotels

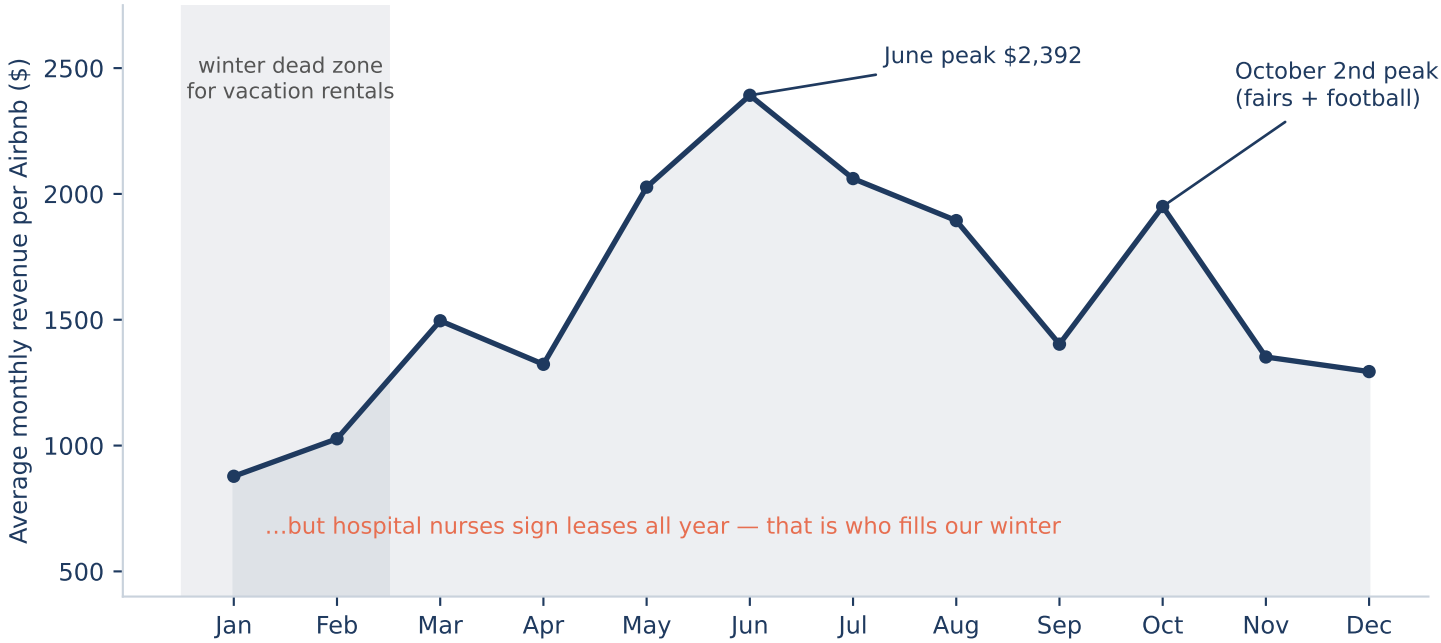

## 2 · Three measuring sticks, one market — plan for the LOW two, not the rosy one

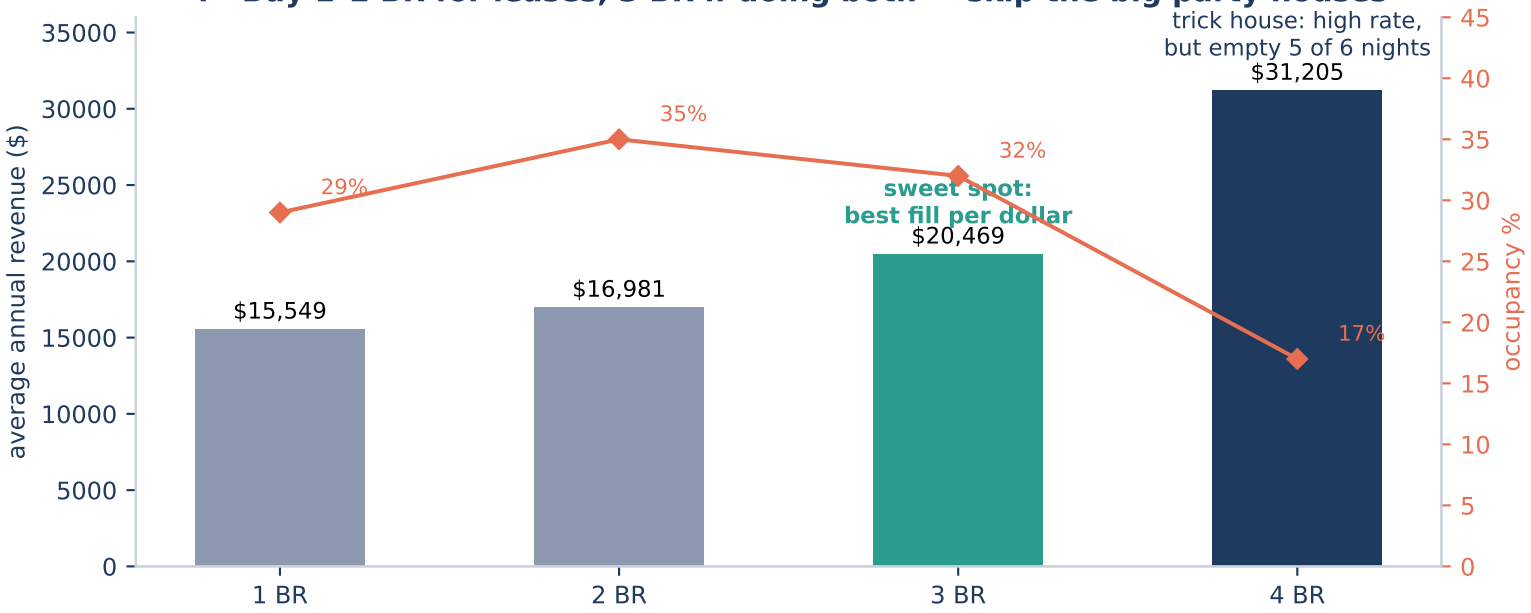

Sources: Rabbu Florence AL (Apr 2026) · AirROI 2026 dataset · AirDNA (TTM Aug 2026) · Choice Hotels Florence rates Oct 2026

# When guests come — and what to buy

## 3 · Seasonality: tourists vanish in winter; nurses do not

## 4 · Buy 1–2 BR for leases, 3 BR if doing both — skip the big party houses

Sources: Rabbu by-size data (ADR 132/114/171/280 · occupancy 29/35/32/17%) · Rabbu monthly revenue curve

# The numbers behind the pitch

## 5 · What the guest pays: our lease wins by thousands, not percents

| tion for a 13-week nurse stay (91 nigh | Total cost | Saves vs hotel |
|---|---|---|
| $93 Quality Inn every night | $8,463 | — |
| $139 Comfort Suites every night | $12,649 | — |
| OUR PLAN: furnished house, 3 months at $1,8 | $5,400 | 3,063–7,249 |

Source: Choice Hotels Florence rates (Oct 2026) × 91 nights vs 3 × $1,800. Traveler saves even against the CHEAPEST hotel.

## 6 · The deal in one table: leases beat Airbnbing the same house

| Per house, per year | Safe plan (base) | Great execution (upside) |
|---|---|---|
| Money in (gross rent) | 16,200–22,800 | $28,800 |
| Money left after costs (NOI) | 8,900–13,000 | $18,200 |
| Same house as nightly Airbnb (NOI) | $7,000 | $16,700 |
| Break-even cost to control the house | 340–580/mo | 990–1,120/mo |

Sources: analyst pro-formas from AirROI tiers + Rabbu 3BR comps; full math in the main report §7. Assumes 75–90% fill at $1,600–2,000/mo.

## 7 · The 12-month plan: prove it on ONE house before scaling

| Step | When | What happens |
|---|---|---|
| 0. Green light | Month 0 | Confirm we own / can buy cheap; check city rules |
| 1. One house | Months 1–2 | Furnish to nurse standard, $8–10K cap |
| 2. List it | Months 3–4 | $1,800/mo ask — 75-day stop-loss clock starts |
| 3. Tune it | Months 5–8 | Adjust price; test $2,200–2,400 |
| 4. Grow (only if it works) | Months 9–12 | Add a 2nd house; else stop, having risked one house |

Kill rules: no cheap house found in 30 days, or no signed lease in 75 days → we stop. No night-by-night rentals without a city permit, ever.
